Automatic Packet Reporting System

APRS Thursday Net

Started in 2022, Mike KC8OWL

<https://groups.io/g/APRS/>

<https://www.facebook.com/groups/307390006330079>

<https://aprsph.net/aprsthursday/>

Weekly check-in via APRS message at anytime during a Thursday, UTC

Message is sent with a join request to the APRS announcement server

Net check-in report is published the following day

We have successfully done this via MB7VR, our local digipeater & igate

APRS Thursday

RATS INTRODUCTION

RATS / APRS

Ian Saturley <ian@m0ijs.net>

28 December 2022 at 11:55

To: RATS Members List <members---rugby-amateur-transmitting-society-rats@googlegroups.com>

Hi All,

Every weekday morning we have a net on 2Mtrs. 144.275MHz USB.

Over the last few days on this net I've mentioned an APRS activity that happens on Thursdays. I've been meaning to get involved for ages now but other commitments etc seem to get in the way. What with it being Christmas week - no better time to give it a go.

I'm sharing this at the request of a couple of members and knowing quite a few of us have APRS capable radios:

Kenwood TH-D72 & TH-D74, Yaesu FT3D & others.

We also have our local APRS digipeater MB7VR!

The idea is that messages can be sent from an APRS radio to an announcement server. This message, if sent to the correct group, forms a 'net login' for the purposes of joining an APRS net. That's it, really simple.

To test out the idea I started off a new group on the announcement server called "RATS" and sent a couple of messages to this. They were captured and gated via our digipeater, MB7VR. Then acknowledgements were sent back from the announcement server to my radio via the digipeater. All good. On Thursday I'll do basically the same but change the group I join to the one being used for this net.

The APRS Thursday net idea was promoted over the APRS Facebook group. I've captured the notice here and attached it as PDF for those that are not using Facebook.

Think of the announcement server as a kind of "bot". You send it messages, it takes action on them. Messages are sent to the destination "ANSRVR". The payload of that message is parsed by the server to determine the action.

Examples:

"J RATS" Subscribe to a group called RATS

"U RATS" Unsubscribe to a group called RATS

"CQ RATS" Message Subscribe and send a message to others within a group called RATS.

"D RATS" Return a description of a group called RATS and number of subscribers

"L" Return all the groups I'm subscribed to

If you have an APRS capable station, on Thursday, consider sending a CQ to HOTG with a message like Rugby ATS. Eg:

cq hotg Rugby ATS

As always, remember the longer the message, the more good luck you need in getting it received! Every character presents the opportunity for a CRC error. Any errors and the frame will be dropped.

If you send a message but did not receive (or successfully decode) the ack, you can use the following link to see if the message made it into the network:

<https://aprs.fi/?c=message&call=ANSRVR&limit=50>

-Shout off the list with any questions.

#APRSTHURSDAY Weekly Net

Join us every Thursday for the weekly #APRSTHURSDAY worldwide APRS net.

Every Thursday, an APRS net is conducted to encourage use of APRS, allow an opportunity to learn more about its characteristics, and make a few new contacts. The net is open to any and every properly licensed amateur operator anywhere in the world.

The net is conducted using the Announcement Server service provided by KJ4ERJ. Below is an example of the simple ONE STEP process to check in using a Yaesu FT5D (the format would be the same on any other APRS capable radio too). Once checked in, you will receive all APRS net traffic from stations checking in for the following 24 hour period.

When:
• Every Thursday from 00:00 to 23:35 UTC.

Where:
• The **HOTG** Group on the Announcement Server (**ANSRVR**).

How:
• One step Process shown in example on to the right and outlined below.
• Send to Station: **ANSRVR**
• Message: **cq hotg [space] your message text**

Who:
• All properly licensed amateur operators anywhere in the world.

Why:
• Learn a new, or enhance an old skill
• Better understand the characteristics of APR
• Make new contacts from around the world
• Learn from like-minded individuals
• Why not - it's fun

Checkins will be tabulated and shared the following day (Friday).

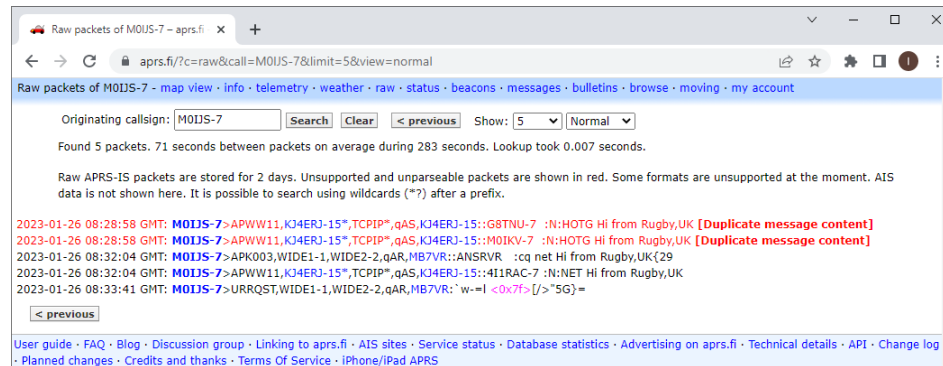

Did you make it in?

Hopefully you received an acknowledgement back from the network. If not, you can do some digging around to see if your message was received.

Your raw frames into the network

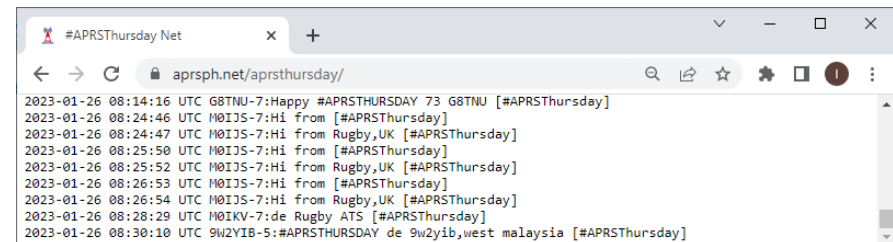

(replace callsign with yours)

<https://aprs.fi/?c=raw&call=CALLSIGN>

The net check-in list
